Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to item/events data process, classified in class 705, subclass 1.
- II. Claims 12-17, drawn to sale/lease process, classified in class 705, subclass 38.
- III. Claims 18-21, drawn to a discrete sections method, classified in class 715, subclass 508.

- V. Claims 33-38, drawn to real property data storage, classified in class 705, subclass 6.
- VI. Claims 39-42, drawn to discrete sections system, classified in class 709, subclass 1+.

The inventions are distinct, each from the other because:

Inventions I and II-VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as creating on phone book of close affiliates. See MPEP § 806.05(d).

Inventions II and I,III-VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as data for heating and cooling management. See MPEP § 806.05(d).

Inventions III and I,II,IV,V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as confidential information viewer wherein only certain sections are viewable to a given user. See MPEP § 806.05(d).

Inventions IV and I-III,V,VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention IV has separate utility such as a cut and paste data processor. See MPEP § 806.05(d).

Inventions V and I-IV,VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention V has separate utility such as an online real estate viewing system. See MPEP § 806.05(d).

Inventions VI and I-V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention VI has separate utility such as a sale by owner web site making device. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
